# WHY SELECT FOOTBALLS ARE PLAYER'S CHOICE™

## HIGHEST QUALITY

At SELECT, we create footballs of the highest quality. Durability and functionality are always in focus when we work on the production of our footballs.

## FOOTBALLS FOR ALL PURPOSES AND LEVELS

With us, you'll find footballs for top professional levels, club level, street football, technical training, indoor football, artificial grass, youth football, and leisure football.

## RECOGNIZED BY MAJOR FOOTBALL LEAGUES

Several major football leagues play with our footballs, including the German Bundesliga under the DERBYSTAR brand. Additionally, we have been the official ball sponsor of the Danish Football Association (DBU) since 1951.

## INNOVATIVE INVENTIONS

In 1962, our founder, Eigil Nielsen, developed a football with 32 panels – a revolutionary design in the world of football. Until then, footballs had only 18 panels as standard, which resulted in an unreliable ball. The newly developed SELECT football, on the other hand, had an optimal roundness, ensuring a straight and predictable flight as well as a controlled bounce. The invention of the football with 32 panels has been greatly appreciated by many football players ever since.

Developing the football is still a major focus for us, and in 2022, we were able to present the first FIFA-approved intelligent football: the SELECT Brilliant Super iBall with built-in chip technology.

## FOOTBALLS WITH RECYCLED MATERIALS

We are also developing in other areas, and green transition is also important to us. Our PLANET football is partially made from recycled plastic bottles. In addition, natural latex is used in this ball. This means that approximately 60% of the ball consists of natural and recycled materials. In addition, our Brilliant Super UZ and Future footballs also contain recycled materials.

## NEW IN 2025

This year, we can present a completely new football to our range, named Future. The composition of this ball contains up to 70% recycled or natural materials, and the ball is also Fair-trade certified. In addition, we have further developed our popular Team football, which in 2025 has been given the new name Team DB, as it is now dual-bonded, meaning it is both stitched and glued together. In addition, our Brilliant Training DB, Classic, Brilliant Replica, Brilliant Super TB, and our League balls have received a new 2025 design.

# OFFICIAL LEAGUE MATCH BALLS

In USA, SELECT is the official match ball of the USL, NAIA and NJCAA as well as several High School State Conferences nationwide.

## BUNDESLIGA

In the past 2023/24 season, an average of 3.2 goals were scored per Bundesliga match. Since the 2018/19 season, when the DERBYSTAR Bundesliga Brillant APS was used for the first time as the official Bundesliga match ball, more than 900 goals have been scored in all seasons, which corresponds to an average of more than three goals per match.

*“Football is a results-driven sport that is measurable by goals. It’s because of these goals and the emotions they evoke that we visit the stadiums and arenas of our favorite clubs or watch the games on screens. Every fan will have their own favorite Bundesliga goal in mind. The new DERBYSTAR Bundesliga Brillant APS symbolically captures the goal theme with typical celebration poses on the twelve colored pentagons”* says Joachim Böhmer, COO of DERBYSTAR

### CLASSIC LOOK WITH MODERN EYE CATCHERS

In terms of details, the sporting goods manufacturer from the Lower Rhine region that is part of SELECT Sport Group once again kept the 20 hexagons of the traditional 32-piece ball construction in bright white, but they are visually linked to the twelve light-blue pentagons by dynamic and eye-catching color highlights. As in the previous season, an emphasis was placed on using ecologically sustainable materials in the making of the ball, hence the underlay of the match ball’s upper material is made from 100% recycled polyester.

## NEW BUCKETS MADE FROM RECYCLED PLASTIC - SAME GREAT CONTENTS

We're excited to introduce our new range of sports massage and recovery products. This series features innovative creams and gels designed to meet your specific needs.

We've given our entire sportscare range a makeover! All our bottles are now made from recycled HDPE plastic (except for the lids). Partnering with Danish company Aage Vestergaard Larsen (AVL), we've created innovative bottles from sorted plastic waste. By switching to this new material, we're cutting down on virgin plastic production and helping to reduce plastic pollution worldwide.

Our popular heat creams have new names, but the same great quality you've come to expect. Our Heat 1, Heat 2, and Heat 3 can really boost a sore area or prepare your body for activity. Our Camphor balm packs a punch and can be used in larger areas.

In addition to our well-known massage cream, we have also launched a new Massage Cream+ with soothing bergamot.

Last but not least, we are proud to present a new gel called "Recovery Gel," based on Aloe Vera, Mint, and Eucalyptus, to aid in post-workout recovery.

**While the look of our well-known buckets has changed, the quality of our products remains the same. Our buckets still contain some of the best products on the market, made locally in Denmark.**

## NEW PACKAGING WITH A NEW DESIGN

NEW

We are proud to present our new series of products for sports massage and recovery. This series includes a range of innovative creams and gels designed to meet your specific needs.

All containers have received a new look. The new innovative containers are made from sorted plastic waste in collaboration with Danish Aage Vestergaard Larsen (AVL). With the introduction of this new material, we reduce the production of virgin plastic materials and simultaneously reduce the amount of plastic pollution that ends up in the world.

In addition, our heat creams and camphor cream have been given new names, but it is the same great content you will find in the containers. Our heat creams Heat 1, Heat 2, and Heat 3 can really boost a sore area or prepare the body for activity. Our Camphor balm comes with a lot of power and can be used over larger areas.

Our well-known massage cream is still available in our range, and there is also a brand-new Massage Cream+ with soothing bergamot. Last but not least, we can present a new gel called "Recovery Gel" based on Aloe Vera, Mint, and Eucalyptus for recovery after training or competition.

Use it as a second skin in areas that's exposed to increased irritation – could be as a layer beneath your shin guards, on the top of your foot to reduce tackle impacts or when introducing new footwear with intentions to reduce risk of blisters.

Being built of PU foam it's easy to remove and leaves no skin residue.

# BALL-PUNKTUR & BALL-STIK

The Ball-Stik and Ball-Punktur were pioneered over 45 years ago by relaxation therapist Grete Wolfgang, in partnership with SELECT. Since then, these massage balls have become iconic, finding their way into gyms, sports clubs, and therapy rooms worldwide.

Designed with a textured surface that combines acupuncture, reflexology, and massage techniques, they stimulate blood circulation and lymphatic drainage to reduce swelling and alleviate muscle tension.

Produced in Denmark since 1972 using phthalate-free plastic, these products, particularly the compact Ball-Punktur, are trusted by Tour de France cyclists for post-race recovery. By enhancing blood flow and muscle strength, Ball-Punktur helps athletes perform at their peak.

# FROM BALL INNOVATOR TO RESPONSIBLE SPORTS PARTNER

**SELECT's founder and national team goalkeeper Egil Nielsen set out to create the perfect football. His vision led to the revolutionary invention of the 32-panel ball - a groundbreaking innovation that is still the standard today.**

SELECT was founded in 1947 by the Danish national football team goalkeeper Egil Nielsen. He was the goalkeeper for the Danish national team that won the bronze medal at the 1948 London Olympic Games. In Egil Nielsen's time, footballers could not make a living from their sport, so he studied sports psychology while working in the footwear and leather industry. During this time, he created the first SELECT football. In 1951, Egil Nielsen entered into an agreement with the Danish Football Association (DBU) to supply balls for the national football team's matches. This was the beginning of a long collaboration between SELECT and the DBU, which still exists today.

In 1962, SELECT introduced one of the greatest inventions in the history of football, namely a ball sewn together from 32 panels, making the ball perfectly round and thus reliable with perfect balance and a straight flight. To this day, this construction is the standard for balls, regardless of manufacturer. In 1974, SELECT stopped using real leather and produced the first hand-stitched synthetic leather ball. Synthetic leather quickly became the preferred choice of players, and today all SELECT balls are made of synthetic leather. SELECT now sells over 4 million balls each year.

## CLOTHING, EQUIPMENT AND SPORTS CARE

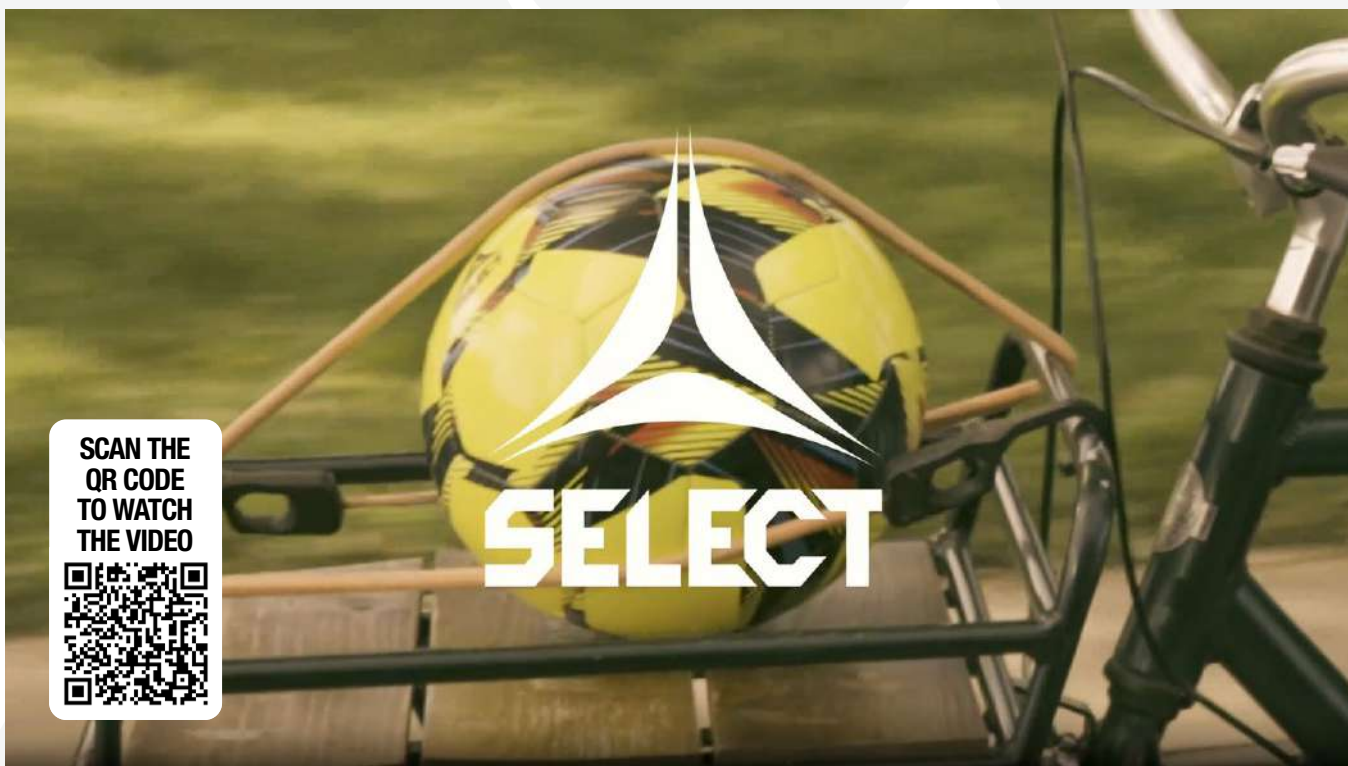

Throughout the 2000s, the SELECT range has been continuously expanded to now also include various sportswear, training equipment and SELECT PROFCARE (which is our category of sports care products in the form of supports, creams, tape, bandages, etc.). Today, we are your dedicated partner in football and handball. Our range is extensive, from innovative balls and high-quality training clothing to professional sports equipment and effective SELECT PROFCARE products. We have everything you need to optimize your performance on the field, and we are a reliable, flexible and dependable partner. Our wide range of balls, sportswear and sports equipment is sold in more than 50 countries around the world.

## RESPONSIBILITY FOR THE FUTURE

We are not only passionate about sports, but also about our planet. Therefore, we have a strong focus on our environmental impact in all aspects of our business. From the choice of materials and production processes to transport and consumption - we are constantly working to minimize our environmental impact. Here are just a few of the measures we have implemented in recent years: we have significantly reduced our plastic consumption on packaging, much of our clothing contains recycled materials, we have produced a reusable water bottle made of sugar cane, we have introduced our PLANET balls which are partly made from plastic bottles, and as something new this year, we are now also introducing new buckets made from recycled plastic. We are constantly working to find new solutions that can make our products and production more environmentally friendly.

**From the Danish lawns to the world's largest stadiums - SELECT has been there all the way! And we still serve both the elite and grassroots. Want to be a part of our history?**

# SUSTAINABLE EFFORTS

## We know that our actions matters.

We are continuously taking sustainable steps in our production, packaging and transportation. We want to reduce the use of plastic in our packaging and are focusing on introducing recycled materials in our products. By using recycled materials, the environmental impact of our products is reduced.

## New sustainable efforts at the ball factory

An installation of **404 solar panel modules** on the rooftop at our ball supplier Anwar Khawaja Industries factory in Sialkot, Pakistan has been completed. The installation is expected to reduce **CO<sub>2</sub> emissions by 270 tons annually**. The factory is also ISO 14001 environmental certified and SMETA 4-pillar certified.

This year, we are introducing new resin and sports care containers that, without the lid, consist of **100% recycled HDPE plastic**

Our factory is now **only using recycled plastic bags** when producing our footballs and clothes

We saved **300.000 plastic packets annually** by switching our Profcare Support packaging from plastic to a smaller cardboard packaging, thereby **reducing our transport volume**

Baselayer underwear for sports made with Repreve® Polyester - a yarn made from **recycled plastic bottles**

Our Brilliant Super UZ league balls and our Ultimate Champions League and Euro handballs are made with a PU material that's partly **recycled plastic from PET bottles** and leftover bits from corn and sugar making

Our SPAIN and MONACO series are made with **recycled polyester**. Check out the product page for specific percentages

Eco ice pack, a CO<sub>2</sub> friendly ice pack without water. By omitting water in the ice packs, we avoid transporting water and will reduce the **CO<sub>2</sub> emissions** compared to our regular ice packs containing water

We have reduced our **use of plastic by 50%** in the packaging of the MONACO, SPAIN, OXFORD and PISA clothing lines

Our v24 cones are made of **recycled plastic** (high density polyethylene)

**Recyclable** water bottles in a **bio-based material** processed from sugar canes

To produce our 2025 catalogue, we have chosen a sustainably conscious printing house carrying the **Nordic Swan Ecolabel**, the **ISO 14001 certification** and an **FSC certification**

# THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single football, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Eigil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels – 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a completely round ball – something Eigil Nielsen had already discovered and realized in his football with 32 panels, why the reinvention was named “the football molecule”.

A ball with optimum roundness is essential to obtain reliable aerodynamic – a straight flight and a controlled bounce. Our finest football, BRILLANT SUPER TB, has been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight – highly valued by all football players.

The majority of our balls are still based on Eigil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

# BLADDERS AND VALVES

Beneath the synthetic leather of our top balls, you'll find a Zero-Wing bladder made of natural latex with a built-in balance point opposite the valve hole. The concept has been developed to ensure not only the ball but also the bladder is as round as possible. On the outer side of the bladder, there is a lining of thick, exclusive foam material. The lining helps adjust the softness and enhances the contact between the ball and foot.

Inside our dual-bonded balls, beneath the synthetic leather, you'll find an SR (synthetic rubber) bladder that holds air excellently.

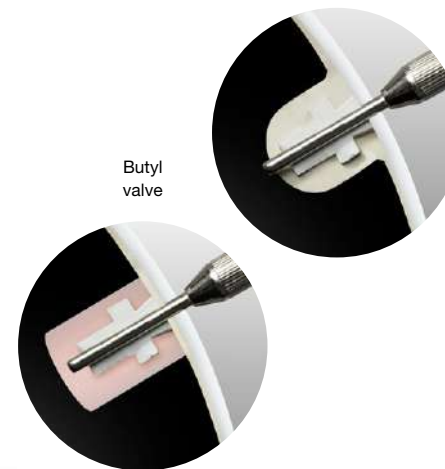

Our futsal balls have a different bladder to ensure the ball has the correct low bounce characteristic of a futsal ball. Hidden behind the elegant surface of the futsal ball is a specially developed butyl bladder with polyester fibers inside. This ensures a highly reliable low-bounce ball compared to a regular football, making it much easier to control and perfect for futsal.

The valve in our bladders differs from bladder type to bladder type. In a butyl bladder, the valve is made of butyl, while on latex and SR bladders, we use rubber valves. Our double-lock construction, where the air must pass through two "gates" to escape, exceeds FIFA's requirements for airtightness. In futsal balls, there is a foam lining around the valve on the inside of the bladder, ensuring that the fibers remain in the ball and do not get stuck in the valve, as this would compromise the ball's airtightness.

# HAND-STITCHED

With care and precision, the 32 panels are meticulously stitched together by hand, creating outstanding quality and durability. Each ball is the result of 630 double stitches and 60 corner stitches, carefully executed to ensure the ball's structure is solid and robust.

The culmination of this meticulous craftsmanship is a double knot that ensures the ball remains intact and retains its shape through intense use. This thorough approach to production ensures not only a longer lifespan for the ball but also consistent and reliable performance on the field.

# THERMO BONDED

TB stands for Thermo Bonding, an advanced method that uses heat and pressure to activate the adhesive bonding the 32 panels together. This means the ball is created without the use of stitches, resulting in a completely smooth surface and a more uniform ball.

This method not only serves to create a seamless construction; TB balls are also designed to effectively resist water absorption. The minimal water absorption helps preserve the ball's original weight, crucial for the gaming experience, especially in wet conditions. Players can trust that the TB ball maintains its quality and performance regardless of the weather conditions on the field.

The TB ball is crafted with attention to detail, delivering an impressive gaming experience that meets the highest standards in ball technology.

# ULTRA ZONIC

In 2021, SELECT set new standards in ball technology by introducing the world's first football manufactured using ultrasonic technology. Brilliant Super UZ represents a groundbreaking construction method that is Danish-patented and unique worldwide. This method uses ultrasonic sound waves to weld the ball's 32 panels together.

During the manufacturing process, the ball's panels are held together under pressure while ultrasonic sound waves activate the microfiber molecules in the material. This is achieved by creating friction, resulting in a seamless fusion of the fields. This advanced method not only guarantees exceptional durability but also ensures minimal water absorption. The ultrasonic welding technique is designed to keep the ball's weight stable, even in wet weather conditions.

SELECT's Brilliant Super UZ is a masterpiece of technological innovation and Danish expertise, bringing a new dimension of performance and reliability to the football world. This ball is created for those who appreciate the best in sports equipment and strive for outstanding performances under all conditions.

# DUAL BONDED

Our dual-bonded ball production method represents a technologically advanced approach to ball manufacturing that combines the best of both worlds. In this method, the ball's 32 panels are both sewn and glued at the edges. Each part of the ball is carefully assembled using 3 mm edge adhesive and stitches, ensuring a strong and durable construction.

In the heat mold, the ball undergoes a process where the adhesive is activated to conceal the stitches. This technique not only provides a smooth surface but also creates a more aerodynamic and uniform ball. Seam sealing is done manually, emphasizing SELECT's focus on craftsmanship quality and precision.

# ULTIMATE iBall WITH A BUILT-IN CHIP THAT TRACKS AND DISTRIBUTES DATA IN REAL TIME

The ULTIMATE iBall is the world's first intelligent handball, featuring an embedded chip that tracks and distributes data in real-time.

The handball made its debut at the EHF FINAL4 in 2018. This was the first major event in European sports to utilize the new tracking technology, capturing precise ball speed, shot registration, shot position, and more. This data can be used to bring fans and media closer to the game.

Our ULTIMATE iBall will once again take center stage at the Men's European Handball Championship in January 2026.

## iBall TECHNOLOGY

Spectators are able to observe the speed of the ball and the distance from goal for every shot in the game.

The shot distribution on court from one team or a specific player will be displayed for broadcasting and digital channels.

The position of every shot entering the goal will be displayed, illustrating scoring strategies. All information is detected automatically and in real-time with interfaces for both broadcast and digital channels.

The top model 88 PRO GRIP consists of 3 mm Pro Tech Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

# INFLATING INSTRUCTIONS

1. Straighten the ball out as best as possible.

2. Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

3. Allow 1 - 2 drops of SELECT valve oil to drip into the valve hole. Remember to oil the ball regularly so that the valve doesn't dry out.

4. Inflate the ball with a SELECT pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

5. Use a SELECT pressure gauge to check if the ball has the recommended pressure (see recommendation on the ball).

6. Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 15 - 20°C.

A SELECT ball will last a very long time if these instructions are followed.
